

Clerks Report (Matters Arising) – April 2019

- The Clerk reported the drain cover 32-34 Wretton Road with Highways.
- Planning application responses from the Parish Council were returned following the March meeting in relation to the mill, mill grain store and Lark Road.
- The Stoke Ferry Parish Council have been successful in its NCC Parish Partnership Funding for Village Gates. The work involved to procure them as in the bid will be actioned early July after the election and audit period has finished.
- CNC Building Control advised that following a visit they did not deem the Dukes Head as dangerous or a concern with fencing that was around the building. The Clerk had gone back to them regarding the chimney and fencing that wasn't around one end of the building, but CNC Building Control advised this was also not of concern. They referred the case back to the BCKLWN as a case of 'Untidy land' as they call it. The BCKLWN confirm that the owner is undertaking some works which they are overseeing.
- NCC Highways had advised on 28.03.19 via email to the Clerk, that they would work with the owner of a property near a collapsed wall on Furlong Road to make the fencing secure, since it had become loose, and consider a more permanent solution to make the area safe.
